LOGISTICS SERVICES DIVISION
WEEKLY REPORT
PERIOD ENDING 27 JULY 1983

I. Progress Report on Tasks Assigned by the DCI/DDCI:

No items this reporting period.

II. Items/Events of Major Interest:

a. Executive Dining Room Office Renovation: On Saturday, 23 July 1983, the office area was renovated, the work station was installed, and the wall phones were connected.

b. Building Modifications, Phase IV: The Architectural Design Staff (ADS) met with the LIMS Staff on 25 July 1983 to discuss preliminary design proposal. The design was approved and working drawings are completed.

STAT

c. Fire in Credit Union, Room 1J37, Headquarters: On Saturday, 23 July 1983, smoke was reported coming from Room 1J37, Headquarters. The Security Duty Officer entered the room and discovered heavy smoke. Two General Services Administration (GSA) sheetmetal workers entered the room and extinguished the fire in the refrigerator in the left rear corner of the room. There was limited smoke damage with minimal damage to the surface of the adjacent column, and damage to the carpet tiles on the raised floor. The refrigerator was a total loss. The McLean Fire Department responded along with Sergeant Nicholas T. Westhoven from the Fire Marshal's Office. Sergeant Westhoven's initial determination of the cause was an instantaneous short, caused by a loose or frayed condenser wire which may have been ignited by the heat from the metal wall where the welding took place.

d. Loss of Water Pressure - Headquarters: On Monday, 25 July 1983, at approximately 1100 hours, LSD was notified that there was a loss of water pressure throughout the building, especially on the Seventh Floor. At 1615 hours, it was determined that a hand valve that had been closed on Sunday, 24 July 1983, restricted the flow of water to the water tower; thereby allowing the water tower to run dry. The valve was opened, the pumps were started, and the tank was filled to capacity at 2000 hours. Normal pressure was restored to the building at this time.

e. Remodeling in Director's Office: The area occupied by the Special Assistants to the Director in Room 7D60, Headquarters, was renovated on 23 July 1983. GSA carpenter, electric, and paint shops along with C&P Telephone and Office of Communications personnel worked overtime to complete the project.

III. Significant Events Anticipated During the Coming Week:

Cafeteria Renovations: The GSA electric, carpenter, and sheetmetal shops are scheduled to work this weekend to prepare the areas in the North and South Cafeterias for the installation of the new cashier checkout counter.
